Advanced Configuration

Ecological and economical

- ▶ Professional customized engine greatly improves fuel economy
Hydraulic oil flow regeneration system ensures optimum machine performance
- ▶ Independent cooling system automatically adjusts fan speed

Excellent after-sales service

- ▶ Global after-sales service system and quick response mechanism
- ▶ Real-time technical consultation and maintenance

Convenient maintenance

- ▶ Easy maintenance design concept makes your maintenance done without dead angle
- ▶ Maintenance-free air prefilter,

Multiple applications

- ▶ Different boom, arm and bucket combinations can adapt to as many working conditions as possible
- ▶ Multi-functional intelligent work tool control system can meet different operating requirements such as digging, breaking and dismantling
- ▶ Instantaneous pressurization function copes with complex working conditions.

Comfortable and safe

- ▶ Air Conditioner and Heater ensure the appropriate temperature
- ▶ Silicone rubber shock absorber is adopted in the cab
- ▶ Air-suspending seat equipped with electric heating function
- ▶ Integrated control panel and large display screen provide multiple information
- ▶ ROPS and FOPS Cab can improve cab safety

Safe and durable

- ▶ Reinforced structural parts improves lifespan
- ▶ Upgrade undercarriage structure to improve load bearing performance
- ▶ Highly reliable with the industry's most advanced variable displacement piston pump

Ecological And Economical

- ▶ The power system uses direct injection, 4-stroke, water-cooled, turbo-charged, air-cooled, six-cylinder engine. The engine uses high-efficiency HPI fuel injection technology to achieve split-cylinder control and full electronic control, which greatly improves fuel economy. An engine specially designed and manufactured for the working conditions of construction machinery. The customized torque curve has the characteristics of low speed and high torque, low fuel consumption and good economy. At the same time, it is in constant power mode in a certain speed range, so that the machine maintains a powerful power output at heavy load and low speed.
- ▶ The hydraulic system uses boom priority, arm priority, swing priority and arm hydraulic oil flow regeneration system to ensure the best working performance of the machine. At the same time, it optimizes the design of hydraulic lines to improve return pressure loss and system back pressure. Reduced energy loss. The use of new technologies such as flow regeneration energy-saving technology, bucket convergence and pressure reduction technology and valve core opening adaptive technology further reduce oil back pressure, improve digging force and improve heavy-duty operation efficiency.
- ▶ The product is equipped with a completely independent cooling system, which can automatically adjust the fan speed according to the water temperature, intake air temperature and hydraulic oil temperature, and reduce the energy consumption of the fan as much as possible under the condition of meeting the heat dissipation requirements.
- ▶ Autonomous control technology: dedicated electronic monitor and controller for independent intellectual property rights, self-programming controller program to finely match engine working speed and pump power, make full use of engine power, improve work efficiency and effectively reduce fuel consumption.

Comfortable And Safe

Comfortable and safe

- ▶ The cab with supercharged function can effectively prevent dust from entering the operation room, providing a clean working environment for the driver; the frame inside the cab is strengthened, the overall structural strength is increased, the pin holes are increased before and after, and the safety performance is improved; the cab is equipped with double-layer clamps. Glue glass, which effectively filters UV rays and has a high degree of protection.
- ▶ The imported silicone oil seals the shock absorber, improves the rigidity of the cab floor, reduces the amount of cab shaking, and reduces the operator's operational fatigue.
- ▶ Warning function: The rotating warning light on the top of the cab can visually remind nearby people, and the high-volume buzzer can provide an audible reminder to nearby people.

- ▶ Wide field of vision: The whole vehicle is equipped with 4 convex rearview mirrors to realize 360° visualization; the night work light adopts high brightness, low energy consumption and can work for 20000h LED lights.
- ▶ The multi-function color liquid crystal display provides operators with comprehensive and easy-to-read machine information, comprehensively monitors the working status of the engine and hydraulic system, and can query various operation and fault diagnosis information of the machine.
- ▶ Air conditioner and heater with double-stage air filtration: the ambient temperature inside and outside can be detected by the sensor and it can be automatically adjusted to a comfortable one. With the adjustable air vents at different positions, it can provide a comfortable environment for the operators.

- ▶ The hydraulic system adopts the most advanced variable displacement piston pump in the industry, which has the characteristics of superior performance and long-lasting output. The high-pressure main oil circuit and the return oil pipeline are all made of steel pipe and buckled hose structure, which is resistant to impact and high reliability; the cylinder is enhanced. Support ring structure, the life is greatly improved, effectively avoiding oil leakage, pulling cylinder and other faults.
 - ▶ The electrical components adopt aeronautical connectors, which have good conductivity, high protection level and high reliability.
 - ▶ The independently developed multi-functional intelligent work tool control system can meet different operating requirements such as digging, breaking and dismantling, and its working condition adaptability is further strengthened.
- It is designed with instantaneous boost function, and you can immediately raise the boom speed or the travel traction by pressing this button.

Reliable And Durable

- ▶ The sturdy lower travel body can meet the needs of heavy-duty operation, and its durability, reliability and maneuverability are higher. The enhanced four-wheel belt is equipped with excellent performance and more reliable quality. It strengthens the walking frame and X-beam structure and improves the horizontal. The strength of the section, the stress of the dispersion body, can be used for harder work.

- ▶ The H-shaped boom and the arm are all integrated with a cast structure, which has uniform force and long service life. The contact surface is made of high-hardness T-sleeve, which greatly reduces surface wear and prolongs the use time. Large-capacity rock bucket The double arc design structure reduces the resistance during excavation, makes it easier to load and unload materials, and adopts the Ultralok series of teeth produced by the famous American company Esko. It has stronger penetrating power, better wear resistance and improved service life. More than doubled.

Maintenance And Service

- ▶ Accessible maintenance design reduces maintenance time by 10%. Integrate electrical box, air filter, diesel filter, oil filter and pilot filter to make maintenance and replacement convenient.

- ▶ The hood is designed with a gas spring-assisted side-up structure and a large opening angle for easy access to the engine and radiator.
- ▶ A protective net is arranged on the outside of the radiator to effectively prevent the inhalation of flying debris and the like, and the disassembly is convenient and the cleaning is easier.
- ▶ A wide range of after-sales service system and quick-response rescue mechanism can ensure that you use machine at ease.

XE490DK hydraulic excavator is an upgraded mine excavator designed by XCMG for heavy duty mining and crushing operations. The product is equipped with XCMG special engine, customized power curve, low speed and large torque output, to meet the strong power output and lower fuel consumption under heavy duty conditions. The hydraulic system adopts new technologies such as flow regeneration energy saving technology, arm confluence pressure reduction technology and valve core opening adaptive technology to further reduce the backpressure of oil return, improve the digging force and the efficiency of heavy-load operation.

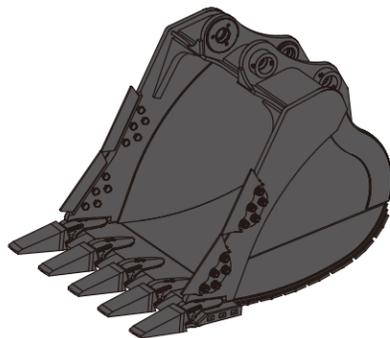

Bucket Configuration Table

Bucket Configuration table				XE490D
		boom:6670mm	arm:2400mm	
type	width mm	capacity m ³	weight kg	
strengthen bucket	2000	3.1	2540	○
		boom:7060mm	arm:3380mm	
type	width mm	capacity m ³	weight kg

strengthen bucket	1879	2.5	2138	○

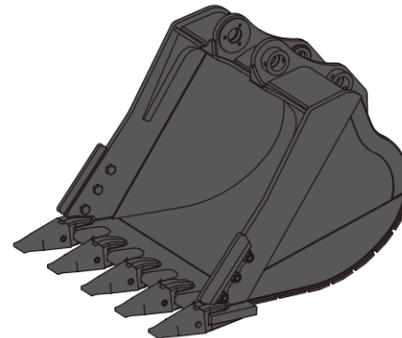

■ :Suitable for materials with a density less than 2100 kg/m³ or less
 ○ :Suitable for materials with density less than 1500 kg/m³ or less

3.1m³strengthen bucket

2.3m³rock bucket

2.5m³strengthen bucket

Combination Methods

Combination method one

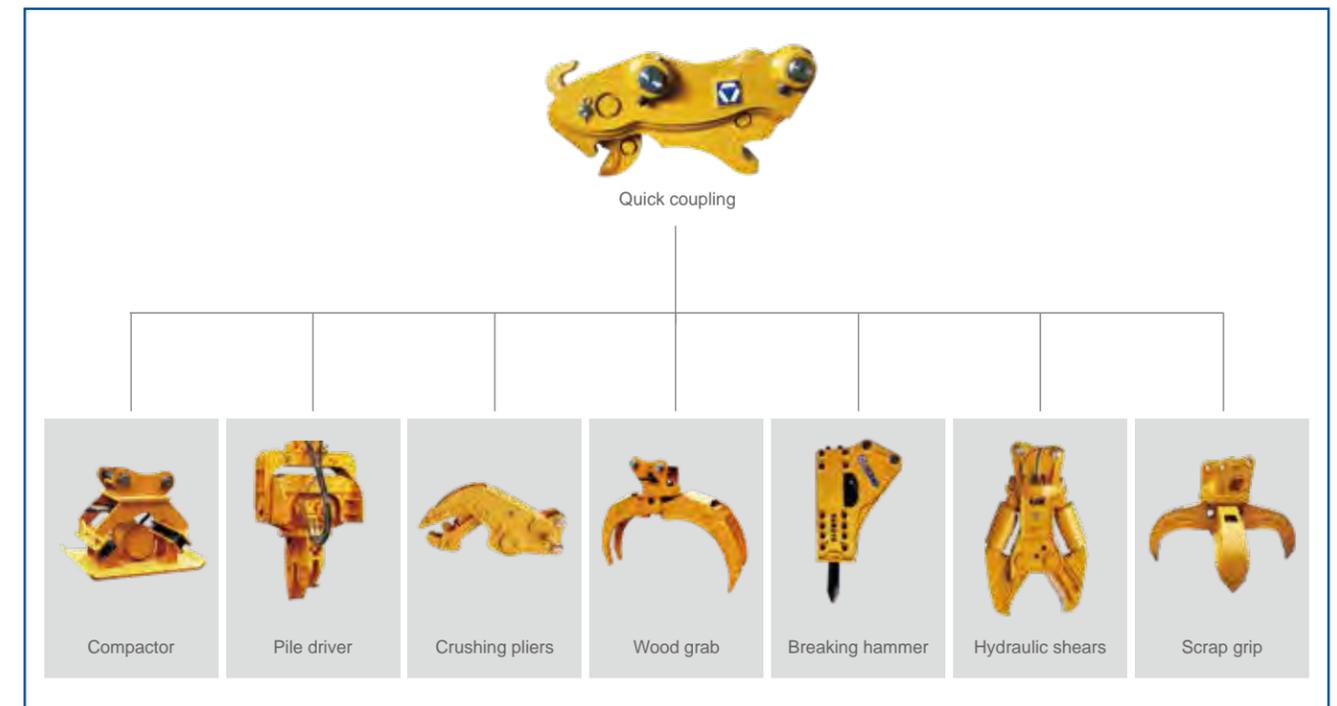

Combination method two

Combination method three

Multiple application conditions

Standard Equipment

	Name of equipment	XE490DK	
Engine	Engine model	QSM11	
	Emission level	National III	
	Automatic preheating		
	Oil-water separator with water level indication sensor		
	Radial seal air cleaner		
	Cooling components of 50°C high temperature environment		
	Radiator dust screen		
	Fuel marker		
	Independent cooling module		
	Fuel breather valve		
	Air pressure difference indicator		
	Automatic idle speed		
	Oil bath type air prefilter		
	Hydraulic system	Boom/arm flow regeneration	
		Reverse rotation damping valve	
Automatic rotation parking brake			
Straight hydraulic circuit			
Boom priority valve			
Rotary logic valve			
Hydraulic oil ISO VG 46			
Rotary anti-sway valve			
Spare valve disc			
Gauge pressure monitoring			
Cab and interior trim	Pressurized cab		
	Fully adjustable mechanical suspension seat		
	Adjustable seat armrest		

Cab and interior trim	Seat belt (51 mm [2 "] wide)
	Openable windscreen with auxiliary device
	Front windshield divided by 70/30 ratio
	Double laminated windshield and other toughened windows
	Sliding door upper window
	Bi-directional air outlet air conditioner with defroster (automatic type) (pressurization function)
	Color liquid crystal display capable of displaying warning information, filter / liquid replacement information and working hours
	Control handle
	Travel control pedal with detachable manual control lever
	Two stereo speakers
	Beverage cup holder
	Coat and hat hook
	Cleanable floor mat
	Retractable seat belt (51 mm [2 "] wide)
	Air conditioning system
Safety and security configuration	High and low gears shift
	One-key boost mode
	Reserved switch for auxiliary equipment
	Shade curtain
	Top sunroof
	Intermittent multi-gear wiper
	Cup holder/envelope
	Radio receiver
	Driving door locks and cabin locks
	Alarm horn
Isolation plate between engine and oil pump chamber	
Rear window emergency exit	
Battery circuit breaker	

	Boom and arm retaining valve
	Overheat alarm
	Safety handrails and pedals
	Rotary alarm lamp
Safety and security configuration	Anti-skid plate/anti-skid paste
	Hydraulic safety locking lever
	Emergency escape hammer
	Left and right rearview mirrors
	Falling object protective structure (FOPS)
	Emergency stop switch of engine
Chassis system and shield	Protective device kit: chassis bottom sealing plate, walking motor sealing plate
	Extended chassis
Working device	Battery (2x650CCA)
	70A Alternator
Electrical system	9KW start motor
	Travel alarm
	24V Cigar lighter
	5V USB interface
	24V Power interface
Lamp	Boom working lamp at left and right side
	Working lamp installed on the right side of storage box
	Lamp inside the cab
	Front working lamp installed on the top of cab
Counterweight	9.2t Counterweight
Technology	XEICS intelligent system

Technology	Data link socket
Lubrication system	Arm concentration lubrication

Optional Equipment

	Name of equipment	XE490DK
Engine	Oil-water separator with heater (24V)	
	Oil and water quick discharge device	
	arm concentration	
	Fuel refueling pump 50L/min	
	Fast fill fuel system	
	Air prefilter	
Hydraulic system	Auxiliary hydraulic valve	
	Hydraulic buffer valve	
	Hydraulic pipeline: quartering hammer	
	Hydraulic pipeline: cylinder and thumb pliers	
	Hydraulic pipeline: Explosion-proof valve line and cylinder	
	Hydraulic pipeline: quick connector	
	Hydraulic pipeline: hydraulic shear	
	Hydraulic pipeline: hydraulic vibrating tamper and high frequency	
	braker	
	Hydraulic pipeline: hydraulic grip	
Operating modes switch		
Hydraulic system	Hydraulic oil ISO VG 32 ,68	
Cab and interior trim	Heated air suspension seat with cushion	
	Onboard oxygen device	
	Fire extinguisher	
Safety and security configuration	Explosion-proof valve for boom and arm pipeline	

	700mm (28 ") three-rib track plate
	800 mm (31 ") three-rib track plate
Safety and security configuration	Track rubber block
	Counterweight rearview mirror
	Rear view monitor camera
	600 mm (24 ") three-rib track shoe
Chassis system and shield	Boom 7.06m
	Arm 3.38m
Working device	2.3m ³ Rock bucket
	2.5m ³ Strengthened bucket
	Ripper
	Quick connector
	Quartering hammer
	Hydraulic thumb pliers
	Scarifier
	vibrating tamper
	Hydraulic shear
	Grip
	High frequency braker
	Clam shell bucket
	Plum-blossom shape grab bucket
	Sreen-type bucket
Arm2.9m	
Bucket 2.5m ³ strengthen bucket	
Electrical system	12V Cigar lighter
	Camera
	Rear working lamp installed on the top of cab

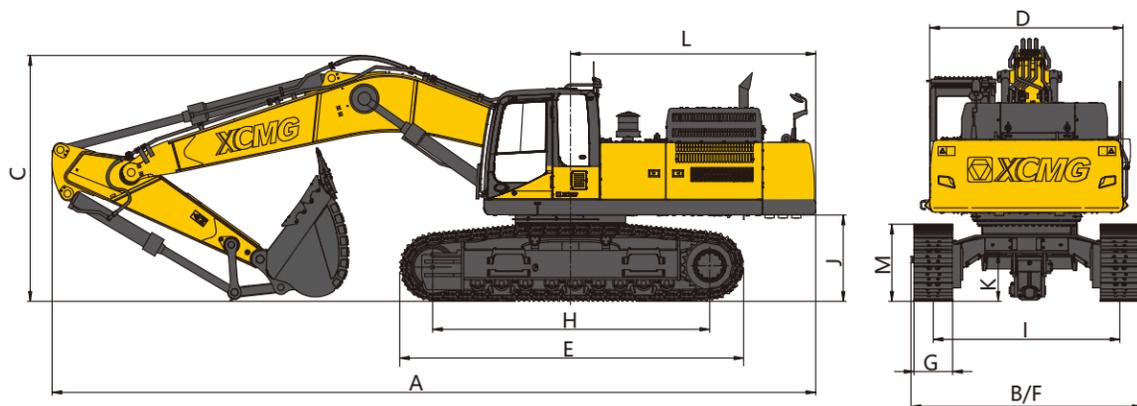

Main Specifications

Item	unit	Main specifications	
Model	/	XE490DK	
Operating weight	Kg	48100	
Bucket capacity	m ³	2.3-3.1	
Engine	Model	/	QSM11
	Direct injection	/	√
	Four strokes	/	√
	Water cooling	/	√
	Turbo-charging	/	√
	Air-to-air intercooler	/	√
	No.of cylinders	/	6
	Rated power	kw/rpm	280/2000
	Maximum torque/speed	N.m/rpm	1898/1300
	Displacement	L	11
	Travel speed(H/L)	km/h	5.4/3.2
Main Performance	Swing speed	r/min	9.2
	Gradeability	°	35
	Ground pressure	kPa	85
	Bucket digging force	kN	339
	Arm digging force	kN	279
	Maximum tractive force	kN	338
	Main pump	/	2
Hydraulic System	Rated flow of main pump	L/min	2×360
	Main safety valve pressure	MPa	34.3/37
	Travel system pressure	MPa	34.3
	Swing system pressure	MPa	31
	Pilot system pressure	MPa	3.9

	Item	Unit	Parameters
Oil Capacity	Fuel tank capacity	L	725
	Hydraulic tank capacity	L	430
	Engine oil capacity	L	38
Standard	Length of boom	mm	6670
	Length of arm	mm	2400
	Bucket capacity	m ³	3.1
Optional	Length of boom	mm	7060
	Length of arm	mm	3380
	Bucket capacity	m ³	2.3(Rock bucket) 2.5(Strengthen bucket)

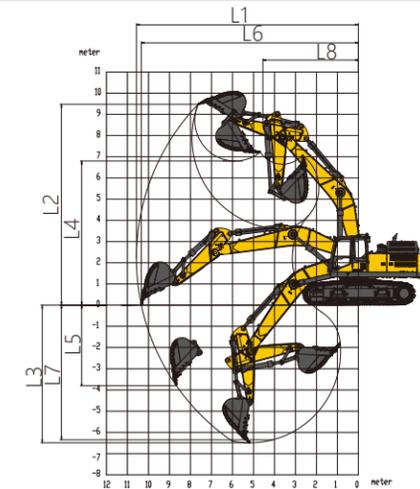

Dimensions

	Item	Unit	Parameters
Apperance size	A Overall length	mm	11830
	B Overall width	mm	3582
	C Overall height	mm	3770
	D Width of platform	mm	3095
	E Track length	mm	5353
	F Overall width of chassis	mm	3582
	G Track shoe width	mm	600
	H Wheel base of crawler	mm	4292
	I Track gauge	mm	2750
	J Counterweight clearance	mm	1324
	K Minimum ground clearance	mm	519
	L Minimum tail swing radius	mm	3800
	M Track height	mm	1070

Working Range

	Item	Unit	Parameters
Working scope	A Max. digging height	mm	9480
	B Max. dumping height	mm	6800
	C Max. digging depth	mm	6530
	D Maximum depth cut for 2240mm(8 ft) level bottom	mm	6315
	E Maximum vertical wall digging depth	mm	3840
	F Max. digging radius	mm	10580
	G Min. swing radius	mm	4550
