Groundsmaster®
4000-D / 4100-D

**Take your productivity
to new levels.**

TORO

Count on it.

Innovation runs in the family.

Power and precision. Ruggedness and reliability. Control and comfort. The Groundsmaster® 4000-D and 4100-D deliver it all with awe-inspiring engine torque, and patented, highly efficient deck drive systems. Add a climate-controlled safety cab and our wide range of attachments, and you have unbeatable productivity for all seasons.

Groundsmaster® 4100-D

- 10.5' (315 cm) width of cut
- All-out-front cutting deck
- SmartCool™ system with auto-reversing cooling fan
- 60 hp (45 kW) Kubota® turbo-diesel engine
- Full-time bi-directional 4WD
- All-season attachments

Groundsmaster® 4000-D

- 11' (335 cm) width of cut
- Three offset cutting decks
- SmartCool™ system with auto-reversing cooling fan
- 60 hp (45 kW) Kubota® turbo-diesel engine
- Full-time bi-directional 4WD
- All-season attachments

Groundsmaster® 4010-D

All the features of the Groundsmaster 4000-D plus a climate-controlled safety cab

Groundsmaster® 4110-D

All the features of the Groundsmaster 4100-D plus a climate-controlled safety cab

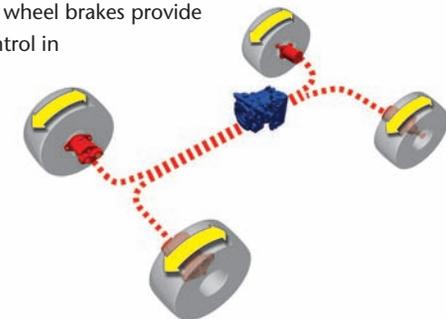

Never loses its cool.

Here's the coolest advancement in our relentless drive to end downtime. The Groundsmaster 4000-D and 4100-D are engineered with our exclusive SmartCool™ technology, so when things heat up under the hood, the system briefly reverses the cooling fan to blast chaff and debris from the air intake screens. The result is nonstop productivity. What more could you ask for?

A design that's gaining a lot of traction.

Because there's no such thing as perfect mowing conditions, the Groundsmaster 4000-D and 4100-D are designed with a patented parallel hydraulic traction system. It maintains constant hydraulic flow between the front and rear wheels, assuring full-time 4-wheel drive in forward and reverse, so you can mow around objects on challenging hills with confidence. Individual wheel brakes provide additional traction control in tough conditions.

More power to you.

What does 60 hp (45 kW) and 125 foot-pounds of peak torque mean in the real world? Your toughest, thickest grass has just met its match. As the HybridDrive™ cutting deck system effortlessly powers the spindles on each deck, and the shallow design quickly disperses the clippings, the Groundsmaster is able to devour more grass faster than ever before.

Wings that really make it fly.

The Groundsmaster 4000-D has independent center and offset wing decks that follow the ground for more efficient mowing in undulating terrain. You can switch easily from a 42" (107 cm) to an 11' (335 cm) cutting swath for maximum versatility.

At the head of its class.

The exclusive all-out-front cutting deck of the Groundsmaster 4100-D is easy to see and control, making this the ideal mower for less experienced operators. It lets you trim in tight areas or open spaces, with a variable width of cut from 54" (137 cm) up to 10.5' (315 cm).

Groundsmaster® 4100-D

“Everybody’s favorite.”

Prairie Pines is a 9-hole golf course in southwest Kansas that’s operated and maintained with the help of part-time employees. So when Superintendent Andrew Trusillo was in the market for a riding mower, reliability and tech support weren’t the only factors at the top of his mind. He also needed a mower that would be easy for anybody to operate. He found it all and more in the Toro 4100-D. “The 4100-D is so comfortable and easy to run, that on mowing day everybody tries to claim it as their own.”

Turns on less than a dime.

We get what the competition misses. The Groundsmaster 4000-D and 4100-D are engineered to mow a 0" uncut circle without the aid of wheel brakes, so you can easily mow back and forth patterns without missing a blade of grass. Our most nimble large area mowers, the Groundsmaster 4000-D and 4100-D deliver the kind of precision turning that lets you trim around trees and other small objects with one or more decks engaged.

TORO

Count on it.

Snow thrower

Removes snow from sidewalks, parking lots and driveways, and throws it up to 30 feet away. Width: 61" (155 cm).

Debris blower

Clears leaves and debris from large areas with a powerful blower fan. Available on the Groundsmaster 4000-D only.

Rotary broom

Sweeps dirt, leaves and snow away from parking areas, walkways and turf. Width: 60" (152 cm).

**It multi-tasks.
Just like you.**

Being the best at mowing is good. Being the best at mowing, throwing snow and clearing debris is a whole lot better. That's the basic idea behind the accessories available for the Groundsmaster 4000-D and 4100-D. Choose your accessories and watch your productivity soar.

Easy maintenance design.

Quick, tool-free access to regular service points, and common parts across the Groundsmaster line simplify routine service and maintenance.

The hardest working mowers just became the most comfortable.

The more comfortable your operators, the more productive they'll be. With an adjustable Air Ride seat, power steering and one-touch controls, we're shifting comfort and productivity into high gear. But that's not all. The Groundsmaster® 4000-D and 4100-D are amazingly quiet, with a low engine speed and low-noise technology gear motors. A comfortable operator is safer, happier and more productive.

The Groundsmaster 4010-D and 4110-D feature a climate-controlled safety cab, with rollover protection and a pressurized air filtration system that keeps dust and debris away from the operator.

Safety starts in the cab.

Even a small increase in temperature can have a substantial effect on operator efficiency and safety. A study by the Society of Automotive Engineers* showed a 50% increase in missed driver tasks and 22% slower reaction times at 81°F (27°C) compared to a temperature of 70° (21°C). Our air-conditioned safety cab will keep your operators at their best, no matter what the outside temperature.
